

30 Watt, 100 μ s, 2.94 μ m SOLID-STATE RESONATOR 7x120mm Er:YAG rod

Room-Temperature Water-Cooled, Flashlamp-Pumped Er:YAG Resonator Assembly

MegaWatt Lasers is pleased to announce the development of a 100 μ s, Er:YAG resonator capable of producing over 3 Joules at 10 Hz! Please Contact MegaWatt lasers, sales@megawattlasers.com +1 (843) 342-7221 for more information

Specifications

Parameter	Nominal Value
Wavelength:	2.94 μ m
Pulse Energy:	3.0 J
Repetition Rate:	10 Hz
Pulse Width:	100 μ s (optical) 150 μ s (electrical)
Average Power:	30 W
Coolant Temp.:	25°C
